MINI PROJECT LOGBOOK

(CSM401: Mini Project 1 B)

GROUP MEMBERS

1. SOPHIA DSILVA [30]
2. SHAHIIL SHET [63]
3. RAGHAV SHRIVASTAVA [64]
4. DHAVAL SUTHAR [69]

Guided By: Mr Rupesh Mishra

Department of Computer Engineering St Francis Institute of Technology,

University of Mumbai (AY 2024-25)

INSTITUTE VISION & MISSION

VISION:

To be a chrysalis where bright youngsters are transformed into technological entrepreneurs and innovative leaders of tomorrow's world, consistent with the Franciscan vision of integrity, peace and love.

MISSION:

To churn highly competent engineering graduates with a commitment to result oriented work, a perennial zest for learning, a quest for excellence, an open mind and the universal values of honesty, dignity and mutual care.

COMPUTER ENGINEERING DEPARTMENT

VISION:

The vision of the computer science program at SFIT is to continuously improve its educational environment to nurture future technological entrepreneurs and researchers, with strong emphasis on ethics and professional code of conduct.

MISSION:

To produce quality computer science professionals with sound conceptual and practical skills, having a sense of social awareness and responsibility.

To inculcate amongst the graduates a knack of lifelong learning and critical thinking, leading to generation of new knowledge and its dissemination, through innovative research and development.

PROGRAM EDUCATIONAL OBJECTIVES (PEO's)

I	To prepare the students for successful professional careers in IT industry and higher studies by training them to adapt to the evolving technologies leading to excellence by providing strong fundamentals of mathematical, computing and engineering principles.

II	To provide an environment for students to work on advance concepts of computer engineering to enhance their professional capabilities.
III	To inculcate entrepreneur Skills by building effective communication skills, professional ethics, leadership, teamwork along with a sense of social responsibility in them.
IV	To provide students experience with the multifaceted aspects of using computers along with developing an eagerness for lifelong learning and adapting new knowledge for problem solving and develop professional application software(s) for some industry/society requirements by applying strong software engineering principles.

PROGRAM OUTCOMES (POs)

	Program Outcome Description
PO1	**Engineering knowledge**: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
PO2	**Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
PO3	**Design/development of solutions**: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4	**Conduct investigations of complex problems**: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
PO5	**Modern tool usage**: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
PO6	**The engineer and society**: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
PO7	**Environment and sustainability**: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
PO8	**Ethics**: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
PO9	**Individual and team work**: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
PO10	**Communication**: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11	**Project management and finance**: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
PO12	**Life-long learning**: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM SPECIFIC OUTCOMES (PSOs)

PSO1	Graduates will be able to apply knowledge of basic sciences & Engineering along with fundamentals of Computer Engineering to identify real time problem and generate appropriate solutions.
PSO2	Graduates will be able to demonstrate knowledge of hardware & software to design and implement solutions of varying complexity to meet specified needs of society.
PSO3	Graduates will be able to adapt to emerging technologies in rapidly changing environments towards sustainable development.
PSO4	Graduates will be able to give innovative solutions by applying Professional, Ethical behaviour and Effective communication skills with entrepreneurial spirit.

STUDENT INFORMATION

Project Title: Online Bug Tracking System

	Student 1	student2	Student 3	Student 4
PID NO	232035	232160	232161	232166
Name	SOPHIA DSILVA	SHAHIIL SHET	RAGHAV SHRIVASTAVA	DHAVAL SUTHAR
Class with Division	SE CMPN - A	SE CMPN - A	SE CMPN - A	SE CMPN - A
Email	Dsilvasophia31@student.sfit.ac.in	shahiilshet@student.sfit.ac.in	Raghavrss14092003@student.sfit.ac.in	Dhav05suthar@student.sfit.ac.in

INSTRUCTIONS TO STUDENTS:

1. The logbook must be submitted to the Guide or Co-Guide for verification and evaluation of project activities at least once a week.
2. Logbook duly signed by the guide must be submitted with a project report for evaluation at the end of the semester to the department.

DECLARATION

I declare that this project represents my ideas in my own words and wherever others' ideas or words have been included, I have adequately cited and referenced the original sources. I also declare that I have adhered to all principles of academic honesty and integrity and have not misrepresented or fabricated or falsified any idea/data/fact/source in my project work. I promise to maintain minimum 75% attendance, as per the University of Mumbai norms. I understand that any violation of the above will be cause for disciplinary action by the Institute.

Yours Faithfully

1. SOPHIA DSILVA
2. SHAHIIL SHET
3. RAGHAV SHRIVASTAVA
4. DHAVAL SUTHAR

(Signature of Students)

Letter of Acceptance

I undersigned, ***Ms. Priya Karunakaran*** working in the Computer Engineering department, willing to guide the project titled ***CustomWear 3D: Interactive Cloth Design*** for the Mini Project 1 B Semester IV respectively for the ***Academic Year 2024-25.*** The names of the students are:

1. SOPHIA DSILVA
2. SHAHIIL SHET
3. RAGHAV SHRIVASTAVA
4. DHAVAL SUTHAR

Mr. Rupesh Mishra
(Project Guide)

COURSE OUTCOMES

CO No.	COURSE OUTCOME	POs covered	PSOs covered
CO1	Identify societal/research/innovation/entrepreneurship problems through appropriate literature survey	PO1, PO2,PO4, PO6, PO7, PO9, PO11, PO12	PSO1,PSO2 PSO3, PSO4
CO2	Design various methodologies for solving the problem identified by applying engineering skills and knowledge	PO1,PO2,PO3, PO4, PO5, PO6, PO7,PO8, PO9, PO10, PO11, PO12	PSO1,PSO2 PSO3, PSO4
CO3	Validate, Verify the results using test cases and analyse, evaluate the impact of solution towards societal/environmental/sustainable development	PO1,PO2,PO3, PO4, PO5, PO6, PO7,PO8, PO9, PO10, PO11, PO12	PSO1,PSO2 PSO3, PSO4
CO4	Draw the proper inferences from available results through theoretical/ experimental/simulations.	PO1,PO2,PO3, PO4, PO5, PO6, PO7,PO8, PO9, PO10, PO11, PO12	PSO1,PSO2 PSO3, PSO4
CO5	Develop entrepreneurship product / prototype and Demonstrate technical competence by participating in various competition	PO1,PO2,PO3, PO4, PO5, PO6, PO7,PO8, PO9, PO10, PO11, PO12	PSO1,PSO2 PSO3, PSO4
CO6	Demonstrate capabilities of self-learning, leading to lifelong learning.	PO1,PO2,PO3, PO4, PO5, PO6, PO7,PO8, PO9, PO10, PO11, PO12	PSO1,PSO2 PSO3, PSO4

SCHEDULE FOR MINI PROJECT

Date	Week	Contents	Remark	Guide Sign
	1	Topic Selection		
	2	Finalization of Topic and Guide Allocation		
	3	Introduction Chapter		
	4	Identify research papers suitable for problem statement		
	5	Review of Literature		
	6	First Mid Term Evaluation		
	7	System Analysis (SRS)		
	8	Block Diagram of the proposed solution		
	9	Implementation		
	10	Conclusion		

PROGRESS/ATTENDANCE REPORT

Title of the Project: **CustomWear 3D: Interactive Cloth Design**			
GROUP NO.	**Sr. No.**	**Name of the Member**	**Roll No.**
A- 04	1.	SOPHIA DSILVA	30
	2.	SHAHIIL SHET	63
	3.	RAGHAV SHRIVASTAVA	64
	4.	DHAVAL SUTHAR	69
Name of the Supervisor: Mr. Rupesh Mishra			

Sr No.	Date	Attendance				Progress/Suggestion	Mapping		
		1	2	3	4		CO	PO	PSO
1						Research on holographic technology and virtual assistants. Study how they work and the possibilities they offer. Explored current holographic technologies and their applications in different fields. Discussed the limitations of 2D interfaces Traditional virtual assistants lack engagement and that holographic assistants offer better interaction.			

2						Research on the hardware and software components required for developing a holographic assistant Identified advanced display technologies and coding platforms needed for building the holographic assistant Finalized the necessary components: holographic display, real-time data APIs (weather, search), and interaction frameworks.			

3						Begin learning and coding the frontend. Focus on creating a visually appealing and easy-to-use interface for the assistant Started building the frontend using a framework suitable for 3D displays. Learned how to integrate real-time data (time, weather). Developed a basic user interface and ensured the system could display changes in wallpapers and setting alarm with some basic app changes.			
4						Continue frontend development and testing while planning backend architecture. Tested the frontend for real-time display functionality. Started discussing how to integrate backend APIs for data retrieval.			

5						Order the necessary components for the project and brainstorm connection methods Discussed the components needed and how they would connect to form the system.			
6						Begin wiring connections between the Wi-Fi module and the display. Completed initial connections to ensure the Wi-Fi module is functional . Established a connection showing that the Wi-Fi module is getting connected.			
7						Connect the display to the Wi-Fi module and test image display functionality Discussed the arrival of the display, searched for research papers related to holographic technology, and explored relevant findings.			
8						Check for more research papers and explore additional functionalities of the display. Reviewed functionalities of the display and updated the PowerPoint presentation with new insights. Expanded knowledge through research and improved the presentation to reflect new functionalities.			
9						Enable the holographic display to show real-time data (time) and change images via the app.			

10						Final phase activities included testing the system across various devices for compatibility, finalizing the documentation, and assigning presentation roles among team members. Minor tweaks for mobile responsiveness were made, and the project was made ready for final submission and presentation.
